Summary

B.E.-IT graduate skilled in full-stack and AI-based development with React, and FastAPI. Experienced in building and deploying end-to-end applications with ML/LLM integration. Strong problem-solver, eager to contribute in a software engineering role.

Education

Bachelor of Engineering in Information Technology Nov 2022 - May 2026

- MCT’s Rajiv Gandhi Institute of Technology, Mumbai • **CGPA:7.47**

HSC in (CBSE) PCMB Aug 2020 - June 2022

- JNV Ratnagiri - Padve, Rajapur • **Percentage: 78.2**

Technical Skills

- Languages:** Java, Python, JavaScript, HTML, CSS
 - Frameworks:** React.js, Node.js, Express.js, FastAPI
 - Databases:** MongoDB, PostgreSQL, MySQL, SQLite
 - Core Concepts:** DSA, OOPs, SDLC, Agile
 - Cloud & Tools:** AWS, Git, GitHub, Postman, Redis, Docker, Vercel, Render, Google cloud run
- ### SOFT SKILLS

 - Problem Solving
 - Team Collaboration
 - Adaptability & Quick Learning
 - Communication Skills

Projects

NewsAura – AI-Powered News Intelligence & Analytics Platform [Live](#) [GitHub Link](#)

- Role:** Designed and built the async backend, integrating ML models, authentication, caching and deployment.
- Built an async news backend with **FastAPI, MongoDB, and Redis (15-min TTL)**, fetching real-time articles across 7+ categories via **GNews API** with automated rate-limit tracking (100 req/day).
 - Designed a multi-stage **ML pipeline** integrating **2 HuggingFace transformer** models for **fake news detection** and **sentiment analysis**, plus **NLP TF-IDF–based** summarization with overflow safeguards and per-article caching to cut redundant inference.
 - Engineered REST endpoints with **Clerk authentication (JWT-based session validation)**, compound **MongoDB indexes** across 10 collections, and **Amazon Polly (AWS) for TTS conversion**, for a scalable, production-ready analytics system.
 - Containerized backend with Docker** and deployed serverlessly on **Google Cloud Run**, with the frontend hosted on **Vercel**, enabling auto-scaling and zero-downtime deploys.

Real-Time Transaction & Audit Log System [Live](#) [GitHub Link](#)

- Developed a **full-stack fund transfer system** supporting **100+ user accounts**, including registration, login, balance management, and transaction history using React, FastAPI, and PostgreSQL.
- Implemented **atomic debit–credit transactions** using database locks and transactions, ensuring **0 partial transfers** and maintaining an **audit log for 100% of successful and failed transactions**.
- Secured **REST APIs** with JWT-based authentication and authorization, enabling **real-time balance updates within 1-2 seconds** on the frontend after each transaction.

Certification

AWS Cloud Practitioner Certification (Self-Paced) - GeeksForGeeks	Dec 2025
OCI 2025 Certified AI Foundation Associate – Oracle	Nov 2025
Master Course in Full Stack Development - Great Learning	Nov 2024

Additional Information.

- Learning new technologies through hands-on implementation.
- Comfortable working across locations and adapting to new work environments.
- Exploring cloud-based application systems.
